Patient Name: JEREMY ZULLO
 MRN: 28523
 Age: 28
 Attending MD: AMRIT P. NARULA, MD

Procedure Date: 9/13/2018 9:15 AM
 Date of Birth: 9/10/1988
 Gender: Male

Procedure: Colonoscopy
 Indications: High risk colon cancer surveillance: Ulcerative proctitis of 8 (or more) years duration
 Referring MD: Ellen Mace-Lalson, MD
 Medicines: Monitored Anesthesia Care
 Complications: No immediate complications.

Procedure: Pre-Anesthesia Assessment:

- Prior to the procedure, a History and Physical was performed, and patient medications and allergies were reviewed. The patient's tolerance of previous anesthesia was also reviewed. The risks and benefits of the procedure and the sedation options and risks were discussed with the patient. All questions were answered, and informed consent was obtained. Prior Anticoagulants: The patient has taken no previous anticoagulant or antiplatelet agents. ASA Grade Assessment: II - A patient with mild systemic disease. After reviewing the risks and benefits, the patient was deemed in satisfactory condition to undergo the procedure.

After I obtained informed consent, the scope was passed under direct vision. Throughout the procedure, the patient's blood pressure, pulse, and oxygen saturations were monitored continuously. The PCF-H180AL Olympus Colonoscope was introduced through the anus and advanced to the cecum, identified by appendiceal orifice and ileocecal valve. The colonoscopy was performed without difficulty. The patient tolerated the procedure well. The quality of the bowel preparation was excellent. The ileocecal valve, appendiceal orifice, and rectum were photographed.

The Colon

Findings:

The perianal and digital rectal examinations were normal.

A 5 mm polyp was found in the cecum. The polyp was sessile. The polyp was removed with a hot snare. Resection and retrieval were complete.

Inflammation characterized by erosions, erythema, friability and shallow ulcerations was found in a continuous and circumferential pattern from the rectum to the splenic flexure and in a continuous and circumferential pattern from the descending colon to the splenic flexure. This was mild in severity. Biopsies were taken with a cold forceps for histology. Two biopsies were taken every 10 cm with a cold forceps. These biopsy specimens were sent to Pathology.

Rectum

Impression: - One 8 mm polyp in the cecum. Resected and retrieved.
- Inflammation was found from the rectum to the splenic flexure and from the descending colon to the splenic flexure secondary to left-sided colitis. Biopsied.

Recommendation: - Patient has a contact number available for emergencies. The signs and symptoms of potential delayed complications were discussed with the patient. Return to normal activities tomorrow.
Written discharge instructions were provided to the patient.
- Resume previous diet.
- Continue present medications.
- Use Colazal (balsalazide) 1 capsule PO TID.
- Imodium 1 tablet PO BID.
- Return to primary care physician as previously scheduled.
- Repeat colonoscopy in 2 years for surveillance.

Chronic Care - Chronic Care Clinic encounter performed at Other.

SUBJECTIVE:**COMPLAINT 1** Provider: Hardy, William MD**Chief Complaint:** Chronic Care Clinic

Subjective: 29 year old Caucasian male, Med Care level 2, PRD 4/2/24, arrived Devens 6/22/17 with a pmhx of Ulcerative Colitis on balsalazide who presents for CCC visit.

Mesalamine was not effective at Schuylkill. Was taking balsalazide prior to incarceration. After incarceration 4 years without medication without flare-ups. Transferred to Schuylkill. Started with flare, BMs 4-5x per day, initial colonoscopy 10/14 unremarkable. Symptoms continued despite mesalamine. Follow-up colonoscopy with left sided colitis with polyp/adenoma 09/2016, then started back on balsalazide, symptoms moderately improved but not resolved, BMs 2-3 x per day. Stopped taking medication upon transfer from Schuylkill, all symptoms have resolved since transfer without medication, 1 BM per day. States that he is pending a repeat Colonoscopy.

No general complaints or Ulcerative Colitis complaints today. Has not been taking any meds since November 2017. Asks to be changed from Med CL 2 to 1.
